example for a simplification with the rule for boolean algebra

$$\overline{a \vee (b \wedge (\bar{a} \vee c) \wedge 1) \vee a}$$

At first we will switch the representation to the following:

$$\frac{1}{a + (b \cdot (1/a + c) \cdot 1) + a}$$

so lets start

$$\frac{1}{(a + (b \cdot (1/a + c) \cdot 1) + a)}$$

1. Put space between the digits

 $\quad$

[illegible]
