example for a simplification with the rule for boolean algebra

$$\overline{a \vee (b \wedge (\bar{a} \vee c) \wedge 1) \vee a}$$

At first we will switch the representation to the following:

$$\overline{(a + (b \cdot (a + c) \cdot 1) + a)}$$

so lets start $\quad\quad\quad$

$$\overline{(a + (b \cdot (a + c) \cdot 1) + a)}$$

1. Put space between the digits

$\quad$

$$\begin{matrix} \begin{matrix} \overline{(a + (b \cdot (a + c) \cdot 1) + a)} & \& \\ \text{Neutral Element} & & \end{matrix} \\ \end{matrix}$$
